On December 15, 2021, the Superior Court of Arizona in Yavapai County implemented the Digital Evidence pilot project. The Digital Evidence portal, made available by the Arizona Supreme Court, will provide a standard online solution for the submission, management, and storage of court case exhibits. The portal offers an efficient and electronic method for sharing exhibits among judges, attorneys, and litigants during virtual and in-person court proceedings.

Due to the limited functionality available to the parties during presentation mode, **IT IS ORDERED** permitting the parties to continue to use physical exhibits, including documents and photos, during in-court proceedings. However, they are still required to upload all exhibits into the Digital Evidence portal. The clerk will stamp the exhibits in the portal, as those will be considered the official record of the court. The physical exhibits used during in-court proceedings will not be marked by the clerk. The parties must ensure the numbering of their in-court exhibits matches the numbering of the exhibits in the Digital Evidence portal.

DATED at Prescott, Arizona, the 24<sup>th</sup> day of January 2022.
